PLANT RELEASE

I understand that fumigation(s) performed by Summit Termite & Pest Control Inc. and Subcontracting Fumigation Company(s) are completed according to industry standards and state law. Precautions will be taken to avoid plant damage. In certain situations, damage will be unavoidable and some plants may be damaged or killed. It is the owner's responsibility to prepare plants properly prior to the arrival of the fumigation crew. Proper preparation by the homeowner will minimize damage to the plants. Reasonable care will be taken by the fumigation crews to avoid plant damage. If you have any questions regarding preparations, please contact us for clarification.

NOTE: TO AVOID ANY DAMAGE, TRIM ALL PLANTS AND BUSHES 8-10 INCHES FROM THE BASE OF THE EXTERIOR WALLS. ANY PLANTS OR BUSHES COVERED BY THE FUMIGATION TARP WILL BE DAMAGED AND MAY DIE. IF APPLICABLE, ANY PLANTS LOCATED IN ENTRYWAYS OR UNDER PATIO COVERS WILL BE COVERED BY THE TARP AND WILL DIE.

IMPORTANT: PRIOR TO FUMIGATION, THE OWNER IS TO MOVE ALL POTTED PLANTS AND/OR POTTERY AWAY FROM THE STRUCTURE TO AVOID ANY DAMAGE.

ADDITIONAL NOTE: As you prepare your home for its upcoming fumigation, we want to remind you not to overlook any family pets and possible wildlife. Family pets must be removed from the premises. ALL openings to spaces that would allow any animals (i.e. opossums, skunks, rats, wild cats, rodents etc.) access inside the structure should be closed. Please alert us of any recent problems with vermin. Contact Summit Termite for additional information or to answer any questions.

I understand that Summit Termite and Pest Control Inc. and Subcontracting Fumigation Company are not responsible for any plant damage resulting from the fumigation performed at the below address.
