ROOF NOTICE

When performing fumigation, it is necessary to walk and work on the roof of the structure. This obviously creates situations where damage due to delicate or old roofing material cannot be avoided. We do not desire to unnecessarily damage anyone's roof. To minimize damage and avoid any misunderstanding(s), we are making the following recommendations:

1. A representative of our company will, if requested, prior to the fumigation be available for an appointment to go over the condition of the roof.
2. If a roof inspection was performed (by a roof inspector), or any type of roof repair was completed during the past year; please advise us prior to commencing work so that we can make certain that no discrepancy(s) will occur.
3. Upon arrival at the job site, our crew will check the roof and notify Summit Termite & Pest Control Inc. of any previous damage and in some cases, our expectation(s) that further damage or breakage might possibly occur during the fumigation.
4. We request the owner, agent, or roofer to be present at the time the tarps are being placed on the structure; in addition to the time during the removal (usually the next day), this will assure all parties of the care exercised by our crew. If at anytime during the process the owner, agent, or roofer feels that the damage is more than expected - *all work can be stopped.*

WAIVER FOR DAMAGE(S) TO TILE OR OTHER DELICATE TYPES OF ROOF COVERING

I/We have been expressly informed by Summit Termite and Pest Control that due to the brittle and fragile nature of tile, metal or other delicate roofing materials, some damage may occur while placing and removing tarpaulins in the course of preparing the structure for fumigation.

With full knowledge thereof, I/we hold harmless Summit Termite & Pest Control and any Subcontracting Fumigation Company for any damage that may/will occur to the roof, shingles, tiles, aluminum, solar panels, TV antennas, skylights, vents, or any wires that are connected to the roof and eaves, etc., during the fumigation at the address below. However, it is also my understanding that reasonable care will be exercised in the fumigation performance of this job:
